DISCOVER WHAT’S POSSIBLE

www.scitation.org
AIP Publishing exists to connect authors and readers to a living legacy of published science, accelerate discovery, and advance the physical sciences. As a not-for-profit organization, we are committed to ensuring that all scientific work supporting our mission be presented, promoted, and made permanently available through our journals, books, and resources.

Even as the scholarly publishing world continues to change, our promise to the scientific community remains constant.

Through an expanding portfolio of 36 publications, our flagship journals, *Applied Physics Letters*, *Journal of Applied Physics*, and *The Journal of Chemical Physics* set the standard for quality across all our publications. The research published in these titles paves the way for new fields of study, gives rise to new techniques, and provides inspiration to contemporary researchers. Other prestigious titles within the portfolio cover plasmas, fluids, mathematical physics, instrumentation, and education.

The AIP Publishing portfolio offers scientists, engineers, and students a foundation of interdisciplinary and emerging research, both basic and applied, that shape the future of research and development.

**INDUSTRY INITIATIVES AND PARTNERSHIPS**

AIP Publishing participates in numerous industry initiatives and partnerships that support and safeguard the flow of scholarly content to the science community.

**ABOUT AIP PUBLISHING**

*Global Reach and Outstanding Quality*

*Access Options*

*Open Science*

*Books from AIP Publishing*

*The Scitation Platform*

*Library Resource Center*

*American Institute of Physics Supports the Community*
Global Reach and Outstanding Quality

Global Dissemination

Researchers from nearly 4,000 institutions spanning 230+ countries across the world access 41M abstracts and download 38M+ articles annually.

Outstanding Quality

Atomic, Molecular & Chemical Physics
- #1 in citations, The Journal of Chemical Physics

Fluids & Plasma Physics
- #3 in citations, Physics of Fluids
- #4 in citations, Physics of Plasmas

Applied Physics
- #3 in citations, Applied Physics Letters
- #5 in citations, Journal of Applied Physics
- 7th highest impact factor, Applied Physics Reviews

Mathematical Physics
- 4th highest impact factor, Chaos

Instruments & Instrumentation
- #5 in citations, Review of Scientific Instruments

Acoustics
- #1 in citations, The Journal of the Acoustical Society of America

Physical Chemistry
- #2 in citations, The Journal of Chemical Physics

Journal Citation Reports™ from Clarivate, 2021*

Global Authorship

In 2020, more than 15,400 ** articles were published from a global community of scientists.

**excludes AIP & LIA Conference Proceedings

Articles Published By Region

The Americas 45%
Asia 27%
Europe 26%
ROW 4%

2022 AIP Publishing Product Guide
Read & Publish

AIP Publishing makes research open and accessible through tailored Read & Publish agreements with academic and research institutions. These partnerships aim to increase open access output to expand the reach of scientific discoveries across the physical sciences.

Researchers, faculty, and students at an institution that has a Read & Publish agreement with AIP Publishing are able to access and download subscribed content from scitation.org. Articles with a corresponding author from participating institutions will be published open access in AIP Publishing hybrid journals, making research output compliant with funder mandates and more visible and accessible to the scientific community.

A simple workflow for authors and an integrated account management system for institutions makes publishing open access through a Read & Publish agreement seamless for everyone. Administrators receive regular usage reports and activity notifications to help monitor publication output and see which articles have been published open access. AIP Complete

**Access to the entire AIP Publishing Portfolio** - [librarians.aip.org/complete](http://librarians.aip.org/complete)

Offering the research community access to highly-cited, peer-reviewed publications including all subscription publications from AIP Publishing, Physics Today, AIP Conference Proceedings, and our publishing partner journals. AIP Complete provides your researchers with access to 29 publications that offer the most current advances as well as an archive of foundational research from notable scientists and Nobel Prize winners to inspire future discoveries. Spanning the physical sciences, AIP Complete encompasses 948K+ articles.

**Subscription Options Available:**
- Frontfile (1999-present) + Backfile (1929-1998) + Print*

* as available

Digital Archive

Secure perpetual access to the complete Digital Archive from AIP Publishing.

AIP Publishing’s Digital Archives offer researchers perpetual access to 402k+ influential articles in physics from AIP Publishing and our publishing partners. Dating back to 1929, this timeless collection provides scientific advancements, and field-defining discoveries, from Nobel Prize winners and notable scientists across the physical sciences.

Institutions have the option to purchase the full archive (AIP Complete) or choose the journals best suited for their collection (DA Choice).
**AVS Bundled Package**

Five journals covering thin films, MEMS & NEMS, interfaces, and surface science; as well as biological interfaces, quantum science, atomic layer deposition, and nanotechnology. *Surface Science Spectra* is included in the package and concentrates on data reproducibility. Content available back to 1964 where available.

**Includes access to:**
- AVS Quantum Science
- Biointerphases
- JVSTA: Vacuum, Surfaces, and Films
- JVSTB: Nanotechnology and Microelectronics
- Surface Science Spectra

**Access options:**
- Frontfile only (1999-present)
- Frontfile + Backfile (1964-present)

---

**Fluids & Plasma Research Package**

Online access to three highly regarded publications for fluids and plasmas researchers dating back to 1929. Access to content is available as Frontfile only (1999-present) or Backfile + Frontfile (1929-present).

**Includes access to:**
- Physics of Fluids
- Physics of Plasmas
- Journal of Rheology

Contact your local Sales Manager to learn which package is right for your institution.

AIP Publishing’s mission is to accelerate science and broadly disseminate new research results to scientists worldwide.

Our commitment to open science spans our entire publication portfolio. We publish eight fully open access journals, and our Author Select option enables authors to make their paper open access in all our other titles.

Our open access journals use a CC BY license, the most liberal Creative Commons license which allows authors to reuse and distribute their work without restrictions. Our hybrid journals use an author friendly license to publish, allowing researchers to retain copyright to their published work. We encourage all authors to post accepted versions of their articles to their personal website or employee webpage immediately after acceptance, and to deposit the accepted version in an institutional or funder designated repository.

AIP Publishing, through participation in the CHORUS initiative, makes publicly available the Accepted Manuscript version of an article in response to government or funder requirements 12 months after publication. AIP Publishing continues to work in tandem with representatives from the library and research communities as well as funding agencies to develop sustainable solutions for public access.

Open Access

Articles are published in a fully Open Access journal are freely available to read, download, and share. Publication is funded by an Article Processing Charge (APC) paid by the author or another sponsor.

AIP Publishing offers eight Open Access journals:

- AIP Advances
- APL Bioengineering
- APL Materials
- APL Photonics
- JASA Express Letters
- Matter and Radiation at Extremes
- Nanotechnology and Precision Engineering
- Structural Dynamics

Open Data

AIP Publishing believes that all datasets underlying the conclusions of the paper should be available to readers. We encourage authors to deposit their datasets in publicly available repositories or present them in the main manuscript. All published articles include a data availability statement that informs readers where the data can be found, and linked data is cited in the references.
Comprehensive, Interactive & Reliable

Our books drive discovery, enable learning, and encourage best practice in scientific analysis. Our three book collections include newly published and recently digitized books that span the breadth of the physical sciences, and offer scientists, researchers, students, and practitioners tools that help them advance in their current field or learn about a new area of study.

Readers gain insight into their area of expertise and learn about:
• New developments in the fields of physical science
• New techniques for data collection and analysis
• Key concepts in new and emerging areas of science

Key Features:
• Multiple formats for access on-the-go
• CrossRef linking on reference lists
• IP authentication, no individual log-in required
• No digital rights management (DRM) allowing for simultaneous access for multiple users
• Figure viewer for easy exploration of images that are downloadable and citable

Building upon our relationship with The American Association of Physics Teachers, we have partnered to publish books that focus on training and development resources for professionals and physics educators.

The Scitation platform offers a seamless interface for users to access content and administrators to manage their account. After logging into your scitation.org account:

**Administrators can:**
- Manage account holdings, admin rights, IP ranges, and more
- Update branding so your users know access is being provided by their institution
- Review and analyze COUNTER usage statistics

**Users can take advantage of:**
- **24/7 online access** to subscribed and OA publications
- **Fully searchable** platform with the capability to save searches
- **One-click** social media sharing
- **Optimized display** across mobile devices and browsers
- **Improved speed** allowing for faster navigation and search functionality
- **Remote access** allowing you to access content from anywhere, anytime
- **View trending articles** and free access to all supplementary material

---

**Facts & Figures**

- **1** AIP flagship magazine, *Physics Today*
- **12** Subscription journals published on behalf of our Publishing Partners
- **2,200+** Volumes in *AIP Conference Proceedings* dating back to 1970
- **8** Gold Open Access journals
- **16** AIP Publishing subscription journals including *Journal of Applied Physics*, *Applied Physics Letters*, and *The Journal of Chemical Physics*
- **1M+** Articles on scitation.org
Managing Institutional Access

AIP Publishing’s Library Resource Center offers an intuitive layout that allows easier access to all the tools and resources needed to manage your account.

From publishing.aip.org/librarians, Administrators can:

- **View** current pricing and licensing policies
- **Download** promotional material to drive user awareness
- **Access** usage reports

- **Link** to AIP Publishing’s KBART file and list of AIP Conference Proceedings
- **Learn** about new products and offers
- **View, download, and share** training guides and webinars

Manage your Account:
Tools and resources available to promote access to your researchers. Also learn what’s new at AIP Publishing and more.

From the Scitation platform, which can be accessed from “Manage Your Account”, Administrators can easily access content and manage account settings in one place. In order to do so, create a profile on www.scitation.org then log on to:

- Manage IP ranges
- View licensed content
- Manage administrator access to the account
- Access usage reports
- View KBART Holdings, and set-up Link Revolver and Shibboleth

A complete Administrator User Guide can be downloaded from the Library Resource Center. librarians.aip.org/tools
AIP Advances is an open access, multidisciplinary journal covering all areas of the physical sciences—experimental, theoretical, and applied. The inclusive scope and publication standards of AIP Advances make it an essential outlet for scientists across the physical sciences.

Coverage:
All areas of applied, theoretical, and experimental physical science research

Deputy Editors:
Javier Garay
University of California, San Diego
San Diego, CA, USA

A.T. Charlie Johnson, Jr.
University of Pennsylvania
Philadelphia, PA, USA

Ben Slater
University College London
London, UK

Masaaki Tanaka
The University of Tokyo
Tokyo, Japan

Enge G. Wang
Peking University
Beijing, PR. China

Journal Impact Factor: 1.55*
2022: Volume 12, 12 issues
(online only)
E-ISSN: 2158-3226
aip.scitation.org/journal/adv

AIP Conference Proceedings contain over 100,000 articles published in more than 2,000 proceedings since its inception in 1970. Each year approximately 100 new volumes (some 10,000 papers) are added to this substantial body of scientific literature. Published conference proceedings are valuable as topical status reports providing quick access to information before it appears in the traditional journal literature. From the early career researcher to the Nobel Prize winning scientist, AIP Conference Proceedings is an essential platform to facilitate communication and advances within the scientific research community.

Coverage:
All areas of physical sciences in applied, theoretical, and experimental research

ISSN: 0094-243X
E-ISSN: 1551-7616
aip.scitation.org/journal/apc

APL Bioengineering is an open access journal publishing articles specific to the understanding and advancement of physics and engineering of biological systems. The journal serves the bioengineering and biomedical research communities by publishing original research articles, reviews, and perspectives.

Coverage:
All areas of bioengineering including: biofabrication and bioprinting; biomedical instrumentation and imaging; biomedical microdevices and sensors; biomimetic materials, devices, and processes; biophotonics; cell and molecular biophysics; cell and tissue engineering; drug delivery and gene therapy; engineered living systems; genome engineering; molecular, cell, and tissue biomechanics; regenerative medicine; soft robotics; stem cell engineering; systems biology and computational biology

Editor-in-Chief:
Justin Cooper-White
University of Queensland
Brisbane, Australia

Indexed in Web of Science and Pubmed:
2022: Volume 6, 4 issues
(online only)
E-ISSN: 2473-2877
aip.scitation.org/journal/apb

APL Materials is an open access journal that features original research on significant topical issues within the field of materials science. The journal also publishes perspectives, research updates, and special topic collections on emerging areas in materials science.

Coverage:
All areas of materials science including: nanomaterials and nanostructures; electronic, magnetic and optical materials; organic materials; polymers; biomaterials; energy and environment materials; carbon and amorphous materials; general functional materials

Editor-in-Chief:
Judith L. MacManus-Driscoll
University of Cambridge
Cambridge, UK

Journal Impact Factor: 5.096*
2022: Volume 10, 12 issues
(online only)
E-ISSN: 2166-532X

APL Photonics is the dedicated home for open access multidisciplinary research from and for the photonics community. The journal publishes fundamental and applied results that significantly advance the knowledge in photonics across physics, chemistry, biology, and materials science. It welcomes high-quality original contributions to the science of light and the technology that generates, controls, and detects photons.

Coverage:
Light sources; nonlinear optics; optoelectronics; nanophotonics; plasmonics; biophotonics and biomedical optics; ultrafast photonics; optical communications; quantum photonics; optical imaging; photovoltaics; guided wave optics; sensors; terahertz

One of the most cited journals in Applied Physics*

American Journal of Physics is the archival journal of the American Association of Physics Teachers. The journal is devoted to the instructional and cultural aspects of physical science. Geared toward teaching at the college level, content covers novel approaches to laboratory and classroom instruction, insightful articles on topics in classical and modern physics, apparatus notes, historical and cultural topics, and book reviews.

Coverage:
Physics topics taught at the undergraduate and graduate level; current research in physics and related areas; suggestions for instructional laboratory equipment; demonstrations and teaching methodologies; information on historical, philosophical, and cultural aspects of physics; annotated lists of resources; book reviews

Editor: Beth Parks
Colgate University, Hamilton, NY, USA

Journal Impact Factor: 1.022*
2022: Volume 90, 12 issues per year
ISSN: 0002-9505
E-ISSN: 1943-2909
aapt.scitation.org/journal/ajp

Published on behalf of:

One of the most cited journals in Applied Physics*

Applied Physics Letters emphasizes rapid dissemination of key data and new physical insights, offering prompt publication of new experimental and theoretical papers related to applications of physics phenomena in all branches of science, engineering, and modern technology.

Coverage:
Photonics and optoelectronics; surfaces and interfaces; advanced materials; semiconductors; magnetics and spintronics; superconductivity and superconducting electronics; dielectrics, ferroelectrics, and multiferroics; low-dimensional materials and nanotechnologies; organic electronics and photonics; device physics; biophysics, biomaging, and biosensors; energy conversion and storage; quantum technologies; interdisciplinary applied physics

Editor-in-Chief: Lesley F. Cohen
Blackett Laboratory
Imperial College, London, UK

Journal Impact Factor: 3.791*
2022: Volumes 120 & 121, 52 issues
ISSN: 0003-6951
E-ISSN: 1077-3118
aip.scitation.org/journal/apl

Published on behalf of:

One of the most cited journals in Applied Physics*

Applied Physics Reviews features significant research and reviews covering all areas of applied physics. The journal’s focus is on experimental and theoretical research alongside the application of physics to other branches of science and engineering. Review articles published in the journal provide in-depth coverage of new and emerging areas of interest to researchers interested in the physical sciences.

Coverage:
Photonics, lasers, optics, and optoelectronics; device physics, characterization, and manufacturing; materials synthesis, processing, and properties; nanoscale science and technology; advanced energy materials and concepts; applied biophysics and biomaterials

Executive Editor: Luigi Longobardi
AIP Publishing

Editor-in-Chief: Chennupati Jagadish
The Australian National University
Canberra, Australia

E-ISSN: 1931-9401
aip.scitation.org/journal/are

One of the most cited journals in Applied Physics*
AVS Quantum Science, co-published by AIP Publishing and AVS, is a truly interdisciplinary journal bridging some of the most important research areas, including: Condensed Matter, Atomic, Molecular and Optical Physics, to Biology, Chemistry, and Materials Science, to Computer Science and Engineering, all through the foundations of Quantum Science.

Coverage:
Quantum engineering, quantum materials, quantum photonics, quantum biology, quantum chemistry, quantum communication, quantum sensing and metrology, quantum measurement technology, atoms and molecules in quantum devices, superfluid and superconductors in quantum devices, quantum computers and software, materials and methods for quantum devices, macroscopic and hybrid quantum systems

Editor-in-Chief: Philippe Bouyer
Institute of Optics of Aquitaine
Talence, France
2022: Volume 4, 4 issues
ISSN: 2639-0213
avs.scitation.org/journal/aqs
Published on behalf of:

Biointerphases is an interdisciplinary, peer-reviewed journal featuring all aspects of quantitative soft matter interfaces: chemistry, physics, engineering, theory, and modeling.

Coverage:
Interface spectroscopy; in vivo and in vitro mechanisms; interface modeling; adhesion phenomena; protein-surface interactions; biomembranes on a chip; biofouling; cell-surface interactions; biosensors / biodiagnostics; bio-surface modification; the nano-bio interface; biotribology / bioengineering; molecular recognition; cell patterning for function; polymeric surfaces; ambient diagnostic methods

Editor-in-Chief: Sally L. McArthur
Swinburne University of Technology
Melbourne, Australia
Journal Impact Factor: 2.456*
2022: Volume 17, 6 issues
ISSN: 1934-8630
E-ISSN: 1559-4106

Chemical Physics Reviews is a new journal featuring research articles and authoritative reviews covering all areas of chemical physics. The journal publishes research studies of high quality and comprehensive review articles of new and emerging areas of interest to the chemical physics community. CPR's focus includes experimental and theoretical research of fundamental issues in chemical physics and its applications in other branches of science, medicine, and engineering.

Coverage:
Chemical physics as it applies to chemistry, physics, material and biological sciences, and their interdisciplinary areas

Editor-in-Chief: Luigi Longobardi
AIP Publishing

Editor-in-Chief: Felix N. Castellano
North Carolina State University, Raleigh, NC, USA

2022: Volume 3, 1 issue (online only) E-ISSN: 2688-4070
aip.scitation.org/journal/cpr

Chinese Journal of Chemical Physics is devoted to reporting new and original experimental and theoretical research in interdisciplinary areas at the interface of chemistry and physics. It aims to provide comprehensive understanding of physical and chemical properties of different systems at atomic and molecular levels.

Coverage:
Chemical physics as it applies to chemistry, physics, material and biological sciences, and their interdisciplinary areas

Editor-in-Chief: Xue-ming Yang
Dalian Institute of Chemical Physics, Dalian, China

Journal Impact Factor: 1.114*
2022: Volume 35, 6 issues
ISSN: 1674-0068
E-ISSN: 2327-2244
cjcp.ustc.edu.cn
Published on behalf of:

Journal of Applied Physics is an influential international journal publishing significant new experimental and theoretical results of applied physics research. The journal also publishes perspectives, tutorials, methods and special collections focusing on research of particular current or emerging interest.

Coverage:
Dielectrics, ferroelectrics & multiferroics; electrical discharges, plasmas, and plasma-surface interactions; emerging, interdisciplinary, and other fields of applied physics; magnetism, spintronics, and superconductivity; organic-inorganic systems, including organic electronics; photonics, plasmonics, photovoltaics, lasers, optical materials, and phenomena; physics of devices and sensors; physics of materials, including electrical, thermal, mechanical, and other properties; physics of matter under extreme conditions; physics of nanoscale and low-dimensional systems; physics of semiconductors; quantum physics and technology; thin films, interfaces, and surfaces; soft matter, fluids, and biophysics

Editor-in-Chief: André Anders
Leibniz Institute of Surface Modification (IOM), Leipzig, Germany

Journal Impact Factor: 2.456*
2022: Volumes 131 & 132, 48 issues
ISSN: 0021-8979
E-ISSN: 1089-7550
aip.scitation.org/journal/jap

One of the most cited journals in Applied Physics*
The Journal of the Acoustical Society of America is the leading source of theoretical and experimental research results in the broad interdisciplinary subject of sound. The journal serves physical scientists, life scientists, engineers, psychologists, physiologists, architects, musicians, and speech communication specialists. JASA Express Letters, a component of JASA, is devoted to providing rapid and open dissemination of important new research results and technical discussion in all fields of acoustics.

Coverage:
Linear and nonlinear acoustics; aeroacoustics; underwater sound and acoustical oceanography; ultrasonics and physical acoustics; architectural and structural acoustics and vibration; speech, music, and noise; psychology and physiology of hearing; engineering acoustics; sound transducers and measurements; bioacoustics; animal bioacoustics; and bioreponse to vibration; acoustic signal processing; computational acoustics; acoustics education

Editor-in-Chief: James F. Lynch
Woods Hole Oceanographic Institution
Woods Hole, MA, USA

Journal Impact Factor: 1.84*

Published on behalf of:
ASA Acoustical Society of America

JASA Express Letters is a gold open-access journal devoted to the rapid and open dissemination of important new research results and technical discussion in all fields of acoustics. It serves physical scientists, life scientists, engineers, psychologists, physiologists, architects, musicians, and speech communication specialists who wish to quickly report the results of their acoustical research in letter-sized contributions.

Coverage:
Acoustical oceanography; animal bioacoustics; architectural acoustics; biomedical acoustics; computational acoustics; engineering acoustics; musical acoustics; noise; physical acoustics; psychological and physiological acoustics; signal processing in acoustics; speech communication; structural acoustics and vibration; underwater acoustics; education in acoustics; acoustic standards and practice.

Editor-in-Chief: Charles C. Church
University of Mississippi, MS, USA

2022 Volume 2, 12 Issues
E-ISSN: 2691-1191
asa.scitation.org/journal/jel

Published on behalf of:
ASA Acoustical Society of America

The Journal of Chemical Physics is an international journal that publishes cutting edge research in all areas of modern physical chemistry and chemical physics. The Journal also publishes brief Communications of significant new findings, Perspectives on the latest advances in the field, and Special Topics.

Coverage:
Innovative research in experimental and theoretical areas of chemical physics including spectroscopy, dynamics, kinetics, statistical mechanics, quantum mechanics, polymers, soft matter, materials, surfaces/interfaces, and biological systems

Editor-in-Chief: Tianquan (Tim) Lian
Emory University
Atlanta, GA, USA

Journal Impact Factor: 3.488*
2022: Volumes 156 & 157, 48 issues
ISSN: 0021-9606
E-ISSN: 1089-7690
aip.scitation.org/journal/jcp

Published on behalf of:
ASA Acoustical Society of America

Journal of Laser Applications covers a broad range of laser-related research from fundamental and applied research & development to industrial applications. The journal presents the latest breakthroughs in laser applications related to photonic production, sensing and measurement, as well as laser safety. The recently digitized LIA Conference Proceedings includes over 5900 articles from the ICALEO®, PICALO and ILSC® conferences that are run by The Laser Institute (LIA).

Coverage:
High-precision and high-power materials processing; laser additive manufacturing; laser systems and markets; spectroscopy/imaging/diagnostics/measurements; emerging applications of laser technologies; surface modification; lasers in nanomanufacturing/nanophotonics and thin film technology; medical applications and safety; thermal transportation nanomaterials and nanoprocessing/laser applications in microelectronics

The Journal of Renewable and Sustainable Energy is an interdisciplinary journal covering specific areas of renewable and sustainable energy relevant to the physical science and engineering communities. The journal has a strong focus on integration of disciplines for renewable power technologies at global scales that have the potential to mitigate abrupt climate change. Since volume 12, the journal has increasingly focused on discoveries related to weather-dependent renewable generation (solar and wind).

Coverage:
Energy meteorology and energy climatology; atmospheric physics; weather-dependent energy science and engineering; renewable energy resource assessment; energy and climate; solar energy for power generation (PV, CSP, CPV); wind energy; distributed energy generation; power systems modeling; energy efficient buildings; energy storage; fuel cells; marine and hydroelectric energy; biomass for energy sector decarbonization

The Journal of Rheology is a vital resource for researchers working in fields as diverse as polymer physics and fluid mechanics. It presents experimental results, phenomenological models, and microscopic theories dealing with the rheological behavior of complex materials, including macromolecular, colloidal and particulate solids, and fluids. Application areas include foods, paints, plastics, lubricants, ceramics, coatings, glaciers, and biological fluids.

Coverage:
Colloidal gel yield stress; magnetorheological fluids; associating polymers; entangled polymers; polymer nanocomposites; reactive compatibilization; pastes, foams, and surfactants; interfacial rheometry; microrheology; computer simulations

Published on behalf of:

Journal of Vacuum Science & Technology A has a scope that is focused on the understanding of interfaces and surfaces at a fundamental level and to advance state-of-the-art technological applications of surface science and thin-film materials science.

Coverage:
Applied and fundamental surface science; atomic layer deposition; electronic and photonic materials and their processing; magnetic thin films and interfaces; materials and thin films for energy conversion and storage; photovoltaics including thin-film and organic; plasma science and technology including plasma-surface interactions, diagnostics, deposition, and etching; applications of plasmas to micro- and nanoelectronics; surface engineering; thin-film deposition, etching, properties, and characterization; TEM; in-situ TEM; tribology

Published on behalf of:

Journal of Vacuum Science & Technology B covers microelectronics and nanometer structures with an emphasis on processing, measurement, and phenomena associated with micrometer, nanometer structures and devices and vacuum science and technology.

Coverage:
Compound semiconductor electronics and optoelectronics; devices for energy conversion and storage; dielectrics in micro and nanoelectronics; graphene, carbon nanotubes, and fullerenes; group IV semiconductor microelectronics; lithography; MEMS and NEMS; nanometer science and technology; nanostructured materials and devices including nanowires, nanoparticles, and quantum dots; organic and molecular electronics; photovoltaics based on nanostructured materials, dye-sensitized and other excitonic solar cells; plasmonics; spintronics and magnetic devices; vacuum nanoelectronics; vacuum science and technology

Nanotechnology and Precision Engineering (NPE) is a peer-reviewed, interdisciplinary research journal that covers all areas related to nanotechnology and precision engineering, which provides a forum for researchers of the related field all over the world. Published four times per year, NPE publishes original research articles, reviews, communications and discussions.

Coverage:
- Micro/Nano Devices, Sensors and Actuators,
- Micro- and Nanoscale Fabrication, MEMS/NEMS, Micro/Nano Fluidics, Micro/Nano Optics, Micro/Nanotechnology for Biomedical Applications, Precision Instruments, Precision Engineering, Industrial, Frontier and Future trends for NPE

Matter and Radiation at Extremes (MRE) is committed to the publication of original research and comprehensive and in-depth review papers in all areas of experimental and theoretical physics on matter and radiation at extremes. MRE aims to provide a peer-reviewed Open-Access platform for the international physics community and promote worldwide dissemination of the latest and best research in related fields.

Coverage:
- All areas of physical sciences in applied, theoretical, and experimental research on matter and radiation at extremes.

Editors:
- Co-Editors-in-Chief
  Weiyan Zhang (张维岩)
  China Academy of Engineering Physics, China
- Michel Koenig

Physics of Fluids is devoted to publishing original theoretical, computational, and experimental contributions to the understanding of the dynamics of gases, liquids, and complex or multiphase fluids.

Coverage:
- Turbulent and laminar flows; interfacial flows; instability and transition; biofluid mechanics; particulate, multiphase, and granular flows; micro- and nanofluid mechanics; geophysical and compressible flows; viscous and non-Newtonian flows; computational fluid dynamics; aerospace and aeronautical flow; droplets; viscoelasticity; acoustics; astrophysical flow; transonic flow; continuum mechanics; soft matter; cryogenic flow; foam, bubbles, and film mechanics; Knudsen flow; shockwave phenomena; electrical and magnetic effects in fluid flow; relativistic fluid mechanics; complex fluids; flow orientation and anisotropy; mathematics of fluids; flows with other transport phenomena; fluid physical properties; flows with complex boundary conditions; fluid-structure interactions; flow visualization; contact lines; molecular theory

Physics of Plasmas, published by AIP Publishing in cooperation with the APS Division of Plasma Physics, is committed to the publication of original research in all areas of experimental, computational, and theoretical plasma physics. Physics of Plasmas publishes comprehensive and in-depth review papers covering important areas of study. Special Topics highlighting new and cutting-edge developments in plasma physics. Every year a special issue publishes the invited and review papers from the most recent meeting of the APS Division of Plasma Physics.

Coverage:
Basic plasma phenomena; plasma waves and instabilities; magnetically confined plasmas, heating, confinement; nonlinear phenomena, turbulence, transport; heliospheric and astrophysical plasmas; dusty plasmas; low-temperature plasmas, plasma applications, plasma sources, sheaths; inertially confined plasmas, high-energy density plasma science, warm dense matter; plasma-based accelerators, beams, radiation generation; radiation emission, absorption, and transport

Review of Scientific Instruments publishes novel advancements in scientific instrumentation, apparatuses, techniques of experimental measurement, and related mathematical analysis. Its content includes publication of regular articles, review articles, perspectives, tutorials, and notes on instruments covering all areas of science including physics, chemistry, and biology.

Coverage:
Pump-Probe and resonance ionization lasers and general lasers; spectroscopy and photon optics and detectors; atom/molecule traps, manipulation and detection; ion optics and acceleration, Particle sources and detectors, and nuclear physics; fusion and plasmas; all microscopy, imaging methods, and positioning systems; condensed matter and materials; chemistry, biology and medicine; gravity; geophysics, astronomy and astrophysics, and remote sensing; electronics, electromagnetic technology, microwaves, and power supplies; thermometry; thermal diffusivity, acoustics, photothermal and photoacoustic; sensors, actuators, positioning devices, and MEMS/NEMS; general instruments and experimental techniques or analyses

**Structural Dynamics** is a peer-reviewed, open access journal highlighting research articles on structural determination and dynamics of chemical and biological systems and solid materials, enabled by the emerging new instruments (e.g., XFELs, high harmonic generation, electron sources, etc.) and new experimental and theoretical methodologies. **Structural Dynamics** has frequent special topic issues for example: Transactions from the 70th Annual Meeting of the American Crystallographic Association, Dynamics and Neutron Scattering, and Theory of Ultrafast X-ray and Electron Phenomena.

**Coverage:**
Fundamental problems of electronic and structural dynamics that are tackled by new methods such as: Time-resolved X-ray and electron diffraction and scattering; coherent diffractive imaging; time-resolved X-ray spectroscopies (absorption, emission, resonant inelastic scattering, etc.); time-resolved electron energy loss spectroscopy (EELS) and electron microscopy; time-resolved photoelectron spectroscopies (UPS, XPS, ARPES, etc.); multidimensional spectroscopies in the infrared, the visible and the ultraviolet; nonlinear spectroscopies in the VUV, the soft and the hard X-ray domains; theory and computational methods and algorithms for the analysis and description of structural dynamics and their associated experimental signals.

**Surface Science Spectra** is an international journal & database devoted to supporting authors in publishing their data. SSS is an AVS archival journal and electronic database, that publishes basic materials characterization data that is peer-reviewed and available for you to plot yourself. Much of the data in SSS has also been made accessible through the interactive data analysis tool: eSpectra. Learn more about eSpectra on the following page.

More specifically, SSS publishes XPS, AES, SIMS, Spectroscopic Ellipsometry, LEIS, and UV-vis data on a wide range of materials in both regular and focused topic issues for use by individual investigators and as a reference for analytical laboratories.

**Coverage:**
Reference, comparison, and technical spectra representing a range of spectra including XPS, AES, SIMS, Spectroscopic Ellipsometry, LEIS, and UV-vis on close to 800 different materials with downloadable data.

**The Physics Teacher** is dedicated to the strengthening of the teaching of introductory physics at all levels. The journal includes tutorial papers, articles on pedagogy, current research, and news in physics, as well as history, philosophy, and biography. Notes cover classroom techniques and columns feature demonstration apparatus, and book and film reviews.

**Coverage:**
Tutorial papers; articles on pedagogy; current research or news in physics; articles on history and philosophy of science; biographies; demonstrations; apparatus; book reviews.

AIP Publishing is a wholly-owned not-for-profit subsidiary of The American Institute of Physics (AIP). The American Institute of Physics is an organization of physical science societies, representing scientists, engineers, educators, and students. AIP delivers valuable services and expertise in education and student programs, science communications, government relations, career services, and much more. These are just a few of the available programs and services:

**Education**

**Society of Physics Students (spsnational.org)**
Transforming physics undergraduates into contributing members of the science community through professional development, leadership, scientific outreach, and networking tools.

**GradSchoolShopper.com**
A free service for undergraduates offering the most detailed information about graduate programs in the physical sciences.

**SPS Jobs**
SPS Jobs is the online job portal of the Society of Physics Students and Sigma Pi Sigma. It is the preeminent source for undergraduate physics and astronomy students searching for REUs, internships, and bachelor-level positions. Visit spsnational.org/jobs

**History and Heritage**

**The Niels Bohr Library & Archives – The past will forever lead the future**
The renowned collections of the Niels Bohr Library & Archives include 2,300 linear feet of archival holdings, 30,000 photographs, 1,500 oral histories, and an additional 30,000 book titles, including a rare collection of books and publications.

The rare books collection contains the most important discoveries in the physical sciences in classical mechanics, electricity and magnetism, thermodynamics, condensed matter physics, astrophysics, cosmology, and particle physics. The collection includes works by Galileo Galilei, Isaac Newton, Max Planck, Marie Curie, and Maria Goeppert-Mayer; and is now available for public viewing. aip.org/history-programs
