

Announcing AIP Fusion

A progressive new business model co-created with libraries and consortia

Powering open science with unlimited reading, publishing, and integrated services

Breaking barriers to open research is at the core of our mission. That's why we created AIP Fusion: a single-fee, single-agreement model that delivers unlimited reading and publishing access across all AIP Publishing and partner journals. It's a powerful step in making physics research more open, fair, and impactful for the researchers and global community we serve.

Co-created with libraries and consortia, AIP Fusion is a transformative model that empowers institutions to meet open access mandates while enabling researchers to publish without limits.

Why AIP Fusion?

- One fee = unlimited publishing + unlimited access
- Transparent, predictable pricing with no APCs or caps
- Supports institutional OA compliance goals
- Seamless author workflow: no paperwork, no delays

How It Works

Pricing based on past usage and publication volume

1. ONE AGREEMENT

A single institution- or consortia-wide agreement covers access to all AIPP services. The annual fee is calculated based on your institution's past usage, publishing volume, legacy APC and subscription spend and AIPP's 2024 cost per article.

2. AUTOMATED AUTHOR CAPTURE

Eligible authors are automatically identified at submission—no manual workflows or approvals needed.

3. COMPREHENSIVE REPORTING

Receive regular usage and publishing reports to share with stakeholders and track ROI.

4. OPTIONAL ADD-ONS

Add access to journal backfiles or book collections

Titles Included

With AIP Fusion, your researchers gain access to unlimited peer review, dissemination and discovery services across our comprehensive portfolio of 40+ journals, including 28 hybrid and 12 Gold OA titles (and any new titles launched during the term), all under one agreement. This means unrestricted reading and publishing services across a broad range of disciplines within the physical sciences:
